Other	

Like a complex gyroscopic structure, Solar Black finished metal rings create a unique curvature pattern that evokes the illusion of revolutionary motion like a spinning gimbal rotating on its axis. The orb'd frame wraps around 12 complementary faux candlelights perched on matching bobeches. The overall height ranges from 43 to 196 inches, and the chain easily adjusts in the field. The fixture is ideal for illuminating dining tables, lobbies, entryways and other residential, hospitality and commercial spaces from Cape Canaveral, Florida, to Houston, Texas.. The Atom Enerjisi Chandelier is featured in our American-made, American-designed, handcrafted Atom Lighting Collection, which is manufactured in Yorkville, New York. UL and cUL listed for dry and damp locations.
