An energy efficient innovation for a home or business. This Chandel-Air adds drama and sophistication paired with distinctive custom lighting and fan technology to any room. This fan integrated light fixture features Clear Glass with clean prismatic lines that evoke a dimensional illusion and textural look and complemented with architecturally styled hardware offered in a Polished Stainless Steel finish. Integral LEDs bring out the beauty of the glass while five 5-watt LED downlights deliver task lighting. Fan circulates a windchill to keep your space cool and comfortable during the summer and reverses to pull room air up towards the ceiling and force the warm air back down, in winter. UL and cUL listed for dry and damp locations.
