Like a complex gyroscopic structure, stunning Gold Metallic finished rings create a unique curvature pattern that evokes the illusion of revolutionary motion like a spinning gimbal rotating on its axis. The curvaceous frames appear to orbit around 12 complementary faux candlelights perched on matching bobeches. The overall height ranges from 61 to 241 inches, as the chain easily adjusts on location to meet your lighting requirements. The fixture is ideal for illuminating lobbies, entryways, and other residential, hospitality, and educational institutional spaces. It's the perfect lighting design for enthusiasts of science, physics, and chemistry. The Atom Enerjisi Chandelier is featured in our American-made, American-designed, handcrafted Atom Lighting Collection and is manufactured in Yorkville, New York. The fixture is UL and cUL listed for dry and damp locations.
