Other

Family:: [Panorama](#)

Metal Finish:: [Wrought Iron](#)

The Panorama Pendant features an updated modern version of a particular traditional design style. took a napkin sketch from the designer based on a stained glass drum pendant and transformed it into a three-drum pendant that maintained a visually pleasing light design, although it requires a heavy fixture with a significant amount of metal structure for support. It is ideal for installation above a dining room table in an impressive Great Room with a low ceiling height. The oblong fixture appears light, shallow, and bright but is more complex than it seems with heavy materials and such a large fixture. The designer loved and grew up surrounded by this design style, so it was such an honor to design this chandelier. The client joyously expressed that she lives in a beautiful magazine and is so happy with the results of the chandelier. We gave them a little flare of the traditional in their modern apartment. This unique pendant integrates Travertine Idalight panels with a Creme Carrare Idalight background. The fixture is enhanced with a handsome Wrought Iron frame and hardware. Using a layered lighting approach, Panorama includes 14 inner LED lamps that bring out the beauty of the Idalight and provide gorgeous ambient lighting, while three LED downlights deliver functional illumination on surfaces below. The Panorama Oblong Pendant is featured in our American-made, American-designed, handcrafted Modern Lighting Collection and manufactured in Yorkville, New York. UL and cUL listed for dry and damp locations. Designed by Meghan Laky, an interior designer at BIA Interiors in Manhattan, and featured in their client's apartment in the trendy Dumbo neighborhood in Brooklyn.
