Other	**Family::** Wave **Metal Finish::** White

Grace and beauty are defined. The Wave Pendant has a minimal, modern feel that integrates form and function. A set of slender cables suspends this White Mult-Silicone lighting design from a rectangular canopy for an airy, clean look. Artfully draped and adjustable, these silicone diffusers emit a soft, omnidirectional layer of energy-efficient illumination that offers both a bright touch and a playful, curved structure to spaces. The LED component features a CRI of 90+, 3000K warm white color temperature, and delivers a robust 13,700 lumens. This handsome fixture is perfect over islands, counters, and reception areas where you want to make a design statement, whether in an office or home from Arlington, Virginia, and Omaha, Nebraska, to Sacramento, California. The overall height ranges from 72 TO 145 inches, as the cable length can be easily adjusted in the field to accommodate your specific lighting application needs. The Wave Pendant is included in our American-made, American-designed, handcrafted Modern Lighting Collection and manufactured in Yorkville, New York. UL & cUL listed for dry and damp locations.
